WORK EXPERIENCE

PioneerDevAI   **Aug. 2025 - Present**
Fullstack Engineer   *Cebu City, Cebu*
- Implemented a scheduler with Redis as a distributed lock to process scheduled messages in batches for efficiency.
- Implemented a scheduler message-reconciler with Redis as a distributed lock to update message status from Telnyx to avoid messages being stuck in PENDING status.
- Implemented an automatic dedicated phone number assignment after successful plan subscription using Telnyx API and webhook.
- Integrated Stripe as the payment gateway for the app.
- Integrated Langchain for a chatbot feature to automatically reply to guests requests.
- Collaborated directly with the founder to develop and get feedback about the features to be implemented.

WebriQ   **Mar. 2024 – Aug. 2025**
Junior Fullstack Developer   *Cebu City, Cebu*
- Led the Maxton Manufacturing project migration from Wordpress to StachShift.
- Engineered a robust database schema for Maxton Manufacturing with one-to-many and many-to-many relationships. Wrote custom queries to bypass Supabase limitations, optimizing query performance.
- Developed the front end for Keeler Brass Company's new manufacturing website, converting Figma designs to React.
- Migrated 10+ projects from a legacy tech stack to StackShift, reducing hosting expenses.

Seabu Digital   **May. 2023 – Jan. 2024**
Junior Front-End Developer   *Cebu City, Cebu*
- Led the development of a company website as a junior developer.
- Led the development of partner company CoreBridge Solutions's website.
- Collaborated with the design team to convert their designs into functional sites. Optimized the site by following web standard, lighthouse and pagespeed suggestions which scores SEO up to 90%.
